

POWERING EXCEPTIONAL DELIVERABILITY AND ACCURACY -- GIVING CARE GIVERS FLEXIBILITY AND PERFORMANCE.

A DC acquisition PC used to acquire intravascular ultrasound (IVUS) imaging data at point-of-care.

DC supplies high performance acquisition PCs for global medical instrument companies.

DC designs and engineers based on customer requirements, such as:

- Physical Specifications
- Environmental and Reliability Specifications
- Regulatory Requirements
- Safety Specifications
- Hardware Specifications
- Software Specifications

TECHNOLOGY USE CASE: Image/Data Processing

- Chassis and Footprint
- Mobility
- FPGA, CPU, and GPU integration
- External Power Bricks
- Ethernet, USB, and Digital Video I/O
