

# PROVIDING ON-LOCATION FLEET TRAINING AT THE SPEED OF MODERN WARFARE

---

DC designed a reduced footprint mobile workstation for this On-Demand Training center, bringing essential fleet training to the waterfront and beyond.

---

Previous relationships for flight and ground applications enabled DC to bid on the Synthetic Combat Operations Trainer (SCOTS) product for the on-demand training solution: a “trainer in a container” — the go-anywhere full-spectrum surface navy training solution.

DC supplied compute-intense workstations for the onboard mobile On-Demand Training Center, allowing sailors to train at the shipyard, naval station, or pier.

TECHNOLOGY USE CASE: F8624 and F8711 / Image Processing

- NVIDIA RTX
- RedHat
- Displays
- Render Capabilities
- Compatible with other SCOTS servers
- PXE boot (no local storage)
- Intel Core i7
- 8 USB ports
